Petition Regarding Patent Term Adjustment (PTA)
Indicated in Notice of Allowance

Sir:

1. A Notice of Allowance was mailed on December 1, 2009 for the present application. One of the attachments to the Notice of Allowance was a Determination of Patent Term Adjustment Under 35 USC § 154(b) that indicated that the total patent term adjustment (PTA) to date is 2226 days. It is believed that the correct total PTA is 2575 days.

2. The determination of the total PTA of 2226 days is erroneous because the U.S. Patent & Trademark Office's (PTO) PTA calculator failed to account for two separate PTO delays. The two PTO delay periods should be added together in accordance with the reasoning in *Wyeth et al. v. Dudas*, No. 07-1492 (D.D.C. September 30, 2008) *aff'd Wyeth et al. v. Kappos*, No. 2009-1120 (Fed. Cir. Jan 7, 2010). The number of PTA credits of 2226 days for PTO delay under 35 USC § 154(b)(1)(A) and 37 CFR § 1.702(a)(1) that is shown on the PTA History (Exhibit A) is correct and agrees with the credit calculated by the PTO. However, this delay only accounts for one of the

delays of the PTO. The other delay warrants a PTA credit of 2210 days for PTO delay under 35 USC § 154(b)(1)(B) and 37 CFR § 1.702(b). These two periods of delay overlap; therefore, the total credit for PTO delay should be reduced by the number of days of that overlap, 1585 days. Accordingly, a total PTA credit of 2881 days (i.e., 2256 days + 2210 days – 1585 days) is appropriate based upon the PTO delay. Additionally, the total PTA of 2226 is erroneous because the total number of PTA debits of 30 days for applicant delay that is shown on the Patent Term Adjustment History (Exhibit A) is incorrect. In addition to the 30 day delay, there should be an additional debit of 276 days for Applicant's failure to file a petition to withdraw the holding of abandonment within two months of the mailing of the Notice of Abandonment. Accordingly, the total debit for applicant delay should be 306 days (i.e., 30 days + 276 days). Thus, the correct total PTA to date is 2575 days (i.e. 2881 days of PTA credit – 306 days of Applicant delay).

3. Thus, Applicant believes that the total PTA credit for PTO delay is 2881 days, the total PTA debit for applicant delay is 306 days, and the correct total PTA under 37 CFR § 1.703(f) is 2575 days.

4. In accordance with 37 CFR § 1.705(b), this application for patent term adjustment is filed no later than the payment of the issue fee but after the date of mailing of the notice of allowance.

5. The following statements are required by 37 CFR § 1.705(b)(2)(i).
- i) The correct total PTA credit is 2881 days.
 - ii) The basis for the 2256 days of PTA credit is under § 1.702(a)(1) and is due to the PTO's failure to mail a notification under 35 USC § 132 or a notice of allowance within 14 months of the application's filing date, and the PTO's failure to respond to a reply under 35 USC 132 no later than four months after the date on which the reply was filed. The basis for the 2210 days of PTA

credit is under § 1.702(b) and is due to the PTO's failure to issue a patent within three years of the filing date.

- iii) The basis for the 306 days of PTA debit under § 1.704(b) is due to the Applicant's failure to reply to actions by the PTO within three months after the date on which the action was mailed, and the Applicant's failure to file a petition to withdraw the holding of abandonment within two months after the date on which the Notice of Abandonment was mailed.
 - iv) The total PTA under § 1.703(f) is projected to be 2575 days, which is the total PTA credit for PTO delay of 2881 days less the PTA debit for applicant delay of 306 days.
6. The following statements are required by 37 CFR § 1.705(b)(2)(ii).
- i) The relevant dates as specified in 37 CFR § 1.703(a)(1) for one part of the PTA credit are as follows: the date of August 8, 2002, which is the date that is fourteen months after the date on which the application was filed under 35 USC § 111(a); and the date of July 2, 2004, which is the mailing date of a notification under 35 USC § 121. Thus, the period for this delay runs from August 8, 2002 to July 2, 2004. This period of delay is 694 days. The next relevant date is March 1, 2005, which is the date that is four months after the date on which the applicant filed a reply under 35 USC 132; and the date of June 10, 2009, which is the mailing date of a notification under 35 USC 132. Thus, the period for this delay runs from March 1, 2005 to June 10, 2009. This period of delay is 1562 days. Thus, the total period for delay under 37 CFR § 1.703(a)(1) is 2256 days (i.e., 694 days + 1562 days).
 - ii) The relevant dates as specified in 37 CFR § 1.703(b) for the other part of the PTA credit are as follows: the date of June 9, 2004

which is the date one day after the date that is three years after the date on which the application was filed under 35 U.S.C. 111(a); and the date on which Applicant expects this application to issue, June 28, 2010. Thus, the period of delay runs from June 9, 2004 to June 28, 2010. This period of delay is 2210 days.

- iii) The two periods given in paragraphs 6(i) and 6(ii) overlap for the following periods. The period from June 9, 2004 until the date of July 2, 2004. This period of this overlap is 23 days. And the period from March 1, 2005, until the date of June 10, 2009. This period of overlap is 1562 days. Thus, the total reduction for overlap is 1585 days (i.e., 23 days + 1562 days).

7. The following statements are required by 37 CFR § 1.705(b)(2)(iv)(A) and list circumstances during the prosecution of this application constituting a failure to engage in reasonable efforts to conclude processing or examination of the above-identified patent application as set forth in § 1.704.

- i) The Amendment and Response filed November 1, 2004 under 37 CFR § 1.111 was filed after the three month period for filing a response. Under § 1.704(b), the period of adjustment for delay associated with this reply begins on the day after the date that is three months after the date of mailing of the Office Action on July 2, 2004, and ends on the date the reply was filed. Thus, the period of delay runs from October 3, 2004 to November 1, 2004. This period of delay is 30 days.
- ii) The petition to withdraw the holding of abandonment filed on January 14, 2009, was filed after the two month period for requesting withdrawal of a holding of abandonment. Under § 1.704(b), the period of adjustment for delay associated with the petition begins on the day after the date that is two months after the

date of mailing of the Notice of Abandonment and ending on the date a petition to withdraw the holding of abandonment was filed. Thus, this period of delay runs from April 14, 2008 and ends on January 14, 2009. This period of delay is 276 days.

8. Any patent granted on this application is not subject to a terminal disclaimer. See 37 CFR § 1.705(b)(2)(iii)

9. Applicant reserves the right to file a supplemental Request for Correction of PTA under 37 CFR § 1.705(d) in the event the patent issues on a date other than June 28, 2010.

Respectfully submitted,

Date: 2/26/201

Michael T. Morlock
